

YOUTH BEGINNER CLINICS

The academy based introductory clinics are designed for students with little or no previous tennis instruction. We use a Quick Start curriculum which allows children to learn using low compression balls, smaller scaled courts, and youth sized rackets. Since most kids won't be able to hit a ball yet, we will be covering basic fundamentals through a series of games that lead up to making contact with the ball.

Once we have everyone in the clinic hitting, we will focus on instruction and include proper grips, footwork, and conventional techniques for groundstrokes, net play, and serves. You child will also learn basic court positioning and how to keep score in a tennis match.

These clinics are a fun way to start playing and/or improve your tennis skills by taking group instruction from our certified coaches and mixing in with players of a similar skill level. We cap our Youth Beginner Clinic ratios of player to coach to a maximum of 6 players to insure quality control and deliver more individualized instruction.
